

# FabricFast™ ULTRA

## **FabricFast Ultra Ink** **Pigment Water-based Ink** **for Epson-based Textile Printing Systems**

*Digital ink jet printing on wide range of untreated fabrics with simplified fixation equipment.*

Next generation of ink jet pigment inks provides reliable, simplified digital printing on a broad range of fabrics - including cotton and other natural fibers - while matching the lightfastness, washfastness and crockfastness of screen printing inks.

### **Quality Print**

FabricFast ULTRA is a new, pigment ink jet ink available in a variety of colors. FabricFast features an optimized binder concentration to provide quality print while matching the soft hand, lightfastness, washfastness and crockfastness of screen printing pastes.

The small size of FabricFast ULTRA's sub-micron pigment particle size keeps printheads from clogging over time and ensures consistent high quality print.

### **Simplified Processing**

Unlike dye-based inks, FabricFast ULTRA ink requires no post-treatment such as steaming. The printed fabrics can be heat cured directly at 165C for about 3 minutes.

### **Diverse Applications**

FabricFast ULTRA ink is ideal for a large range of different applications including: design proofs, samples, pre-production runs, home furnishings, t-shirts, apparel and non-apparel textiles, indoor and outdoor signs and banners.

### **Compatibility Made Easy**

FabricFast ULTRA inks are designed for seamless integration with existing printing systems.

The inks are intended for use in systems featuring Epson 9000 or Epson 10,000 Micropiezo Printheads. Such systems include: Mimaki TX-1600S, TX2-1600S, JV2, JV3, JV4, TX3 printers, Mutoh Falcon, Roland SJ, Stork, and Epson 1800, 2100/2200, 3000, 4000, 7800 textile printers and more.

FabricFast ULTRA inks meet the printer specifications achieved with dye-based inks. (360 x 360 or 720 x 720 dpi; 2 / 4 / 8 passes, uni/bi-directional).

### **Ideal for :**

Quality Print on Broad  
Range of Fabrics

Very Soft Hand

Simplified Heat Fixation

Excellent Wash-, Light-,  
Crock- Fastness

Ecological Water-based

Broad Selection of  
Bright Colors

Cost Effective
